EXPERIENCE

Web Developer @ KEYMEDIA

August 2022 – Present

Web Developer at KeyMedia that supports and maintains tons of existing international website portfolios. We continuously monitor and improve performance of our websites, internal CMS, administrative applications, and other tools we use in-line with the organizations' business. Integrating tools for analytics and performance tracking, applying up-to-date techniques and practices. We also handle request changes for our products, carefully study incidents that may occur and apply appropriate fixes to keep our readers happy and satisfied of our services.

Developer @ MACRIN.PH

November 2020 – August 2022

Developer of vaccination related systems used by DICT. Project involvement in VIMS and one of the developers of DICT's VAS Line List Upload Tool, DVAS (DICT Vaccination Administration System), support developer of VORS (Vaccination Operations Reporting System) and so on. Handled important projects related to vaccination information in the Philippines. We develop, deploy to AWS cloud and maintain these systems that eases up the data gathering, accurate information relay, vaccination recordings and more, to have our frontliners effectively do their part in fighting COVID-19.

EXPERIENCE

Software Developer @ DEVELOPER SOFT AND TECHNICAL SUPPORT SEA INC.
June 2020 – November 2020

Support Developer of Devsoft.ph. Proficient in DevExtreme product of DevExpress in JavaScript & Angular platform. We assist customers in studying our controls, help customers find solutions, troubleshoot problems to our products. We also facilitate and bring customer feedbacks to our developers, improve the quality of our products and services and simplify existing out-of-the-box solutions.

Developer @ MACRIN.PH
June 2017 – December 2019

Developer of Production Support Team. Proficient in .Net C#, Entity Framework, Oracle, Angular, Delphi, and has deep knowledge about web apps, 3-Layered Architecture, Restful APIs. We as a team develops new systems for clients, supports and maintain existing ones and handle day to day requests, incidents and write documents about it.

Developer @ CODEWORKS.PH
July 2016 – June 2017

Developer of Production Support Team. We handle client's requests, incidents and tranches (large changes) in client's systems that we support. Our team are proficient in using Delphi, oracle, jsp and php because these are the languages and technology used to make the systems, we are supporting.
